

**UNITED STATES DISTRICT COURT  
DISTRICT OF NEW JERSEY**

**IN RE JOHNSON & JOHNSON  
TALCUM POWDER PRODUCTS  
MARKETING, SALES PRACTICES,  
AND PRODUCTS LIABILITY  
LITIGATION**

**MDL NO. 16-2378 (FLW) (LHG)**

**This document relates to:**

*Lucy Rempas v. Johnson & Johnson, et al; Case No. 3:16-cv-07571*

*Elizabeth Jarrett v. Johnson & Johnson, et al.;  
U.S. District Court, E.D. of North Carolina, Case No. 2:16-cv-00075-BO  
(to be transferred to MDL 16-2378)*

**STATUS REPORT**

Pursuant to this Court's directive, Counsel submits the following report to inform the Court of the status of the above-referenced case(s).

**I. Factual Background of the Cases**

Johnson and Johnson's Baby Powder was introduced to the market in 1893. Since that time, Johnson & Johnson and its subsidiaries have marketed Baby Powder as a safe, mild product intended for use by both mothers and babies. Johnson's Baby Powder is composed, almost exclusively, of pure talc, a soft mineral comprised of magnesium, silicon, oxygen, and hydrogen. In 1966, Johnson & Johnson developed Shower to Shower, another talc-based body powder. Each of these products is marketed for feminine hygiene use, including perineal (genital) application, to limit perspiration, chafing, and other discomfort. Imerys Talc America, Inc. provides all of the talc used in Johnson & Johnson's talc-based body powders.

In 1971, the first study to indicate a possible association between the perineal application of talcum powder and ovarian cancer was conducted by W.J. Henderson in Cardiff, Wales.<sup>1</sup> In 1982, Dr. Daniel Cramer conducted the first case-control study of perineal talcum powder use and ovarian cancer and found a significant increased risk of ovarian cancer among women who use talcum powders in the genital area.<sup>2</sup> Since 1982, numerous studies (27+ studies through October 2016)<sup>3</sup>, involving many of the most esteemed epidemiologists in the world, have

Reeves, Susan E. Hankinson, Lori Crawford, Dorothy Lane, Jean Wactawski-Wende, Cynthia A. Thomson, Judith K. Ockene, and Susan R. Sturgeon.

consistently shown an increased risk of ovarian cancer associated with perineal talc use. Out of these 27 studies, all but one of them found a statistically significant increased risk of ovarian cancer from talc use.

Beginning in September 1971, Johnson & Johnson developed a strategy to refute or discredit the Henderson findings. This included criticizing the Henderson study's techniques, validity, tissues, and references. Johnson & Johnson also focused on trying to prove the purity of the talc they used in their products, rather than performing research to determine if talc itself had any adverse effects when embedded in ovarian tissues. This effort continued for the next 10 years and only intensified after the 1982 study performed by Dr. Cramer. Numerous Johnson & Johnson and Imerys internal documents acknowledge the increasing health concerns involved with genital talc use and ovarian cancer.

In 2005, the International Agency for the Research on Cancer (IARC), an organization that is part of the World Health Organization, voted in favor of declaring perineal use of cosmetic grade talc a group 2B carcinogen, i.e., "possibly carcinogenic to human beings." IARC's rationale for this ruling was: "For perineal use of talc-based body powder, many case-control studies of ovarian cancer found a modest, but unusually consistent, excess in risk, although the impact of bias and potential confounding could not be ruled out." Since the IARC pronouncement, Imerys has placed a warning on the talc Material Safety Data Sheets (MSDS) that it sends to Johnson & Johnson, acknowledging that genital talc use may increase the risk of ovarian cancer.

Published Online with the American Association for Cancer Research, May 12, 2016; Gonzalez, Nicole L., et al. "Douching, Talc Use, and Risk of Ovarian Cancer." *Epidemiology* Publish Ahead of Print, June 20, 2016.

Internal documents from Johnson & Johnson and Imerys Talc America demonstrate that, despite their knowledge of the risk of harm to women, these companies, along with their trade association, the Personal Care Products Council (“PCPC”), actively concealed information regarding the dangers of genital talcum powder use from consumers. Both companies have actively attempted to influence regulatory agencies in an effort to prevent governmental regulation of talc use. This has included the formation of the Talc Interested Party Task Force, formed under the auspices of the Cosmetic Toiletry and Fragrance Association, for the purpose of defending talc-based products. Over the years this task force and other industry-sponsored groups have worked to influence the NTP, FDA, NIH, NIEHS, and other regulatory agencies.

Despite consistent evidence of a causal connection between perineal application of talcum powder and ovarian cancer, neither Johnson’s Baby Powder nor Shower to Shower have been removed from the market or altered to remove talc as a main ingredient. Johnson & Johnson continues to sell these talc-based body powders without a consumer warning.

As a direct result of the Defendants’ actions, untold numbers of women continue to use these products on a daily basis, and thousands of women have been diagnosed with cancer. Over the past few decades, this has led to countless avoidable deaths from ovarian cancer caused by the genital use of talcum powder.

## **II. Discovery in Federal Court**

No discovery has taken place.

## **III. Settlement**

The Parties have not entered into settlement discussions.

## **IV. Pending Motions**

There are two pending motion in *Lucy Rempas v. Johnson & Johnson, et al.* Defendant Imerys Talc America, Inc. filed its Motion to Dismiss for Lack of Personal Jurisdiction and Brief

in Support in the U.S. District Court for the Northern District of Illinois. In accordance with a briefing order issued by this Court, Plaintiff timely filed her response to Imerys Talc America, Inc.'s motion on October 13, 2016. The transferor court did not rule on the motion and the motion is still pending before this Court. Defendants Johnson & Johnson and Johnson & Johnson Consumer, Inc. filed their Motion to Dismiss Counts SIX (fraud) and Eight (fraudulent concealment) on Plaintiff's Complaint in the U.S. District Court for the Northern District of Illinois. The case was transferred before the transferor court entered a briefing schedule or ruled on the motion. This Court has not entered a briefing schedule on the Johnson & Johnson Defendants' motion to dismiss. Once the Court enters a briefing schedule on that motion, Plaintiff will file her response.

There are no pending motions in *Elizabeth Jarrett v. Johnson & Johnson, et al.* The case is still pending in the Eastern District of North Carolina and the Defendants have not filed their answers or any pre-answer motions. Plaintiff anticipates that the case will be transferred to this Court in the near future.

#### **V. Proposed Lead and Liaison Counsel**

Counsel for all Plaintiffs with cases pending before this Court have met and conferred. There is unanimous agreement that Michelle A. Parfitt and P. Leigh O'Dell serve as Co-Lead Counsel of the MDL. Counsel proposes that Christopher M. Placitella be appointed as Liaison Counsel.

Ms. Parfitt and Ms. O'Dell will represent the interests of Plaintiffs who have alleged personal injury claims during the Organizational Conference. The Plaintiffs in the *Rempas* and *Jarrett* Cases are represented by Eric Pearson. Mr. Pearson is confident that Ms. Parfitt and Ms. O'Dell will represent the interests of the Plaintiffs in the *Rempas* and *Jarrett* Cases. Mr.

Pearson is scheduled to be in a Settlement Conference before a Magistrate Judge in Indianapolis, Indiana on November 17, 2016. So, unless the Court wishes to hear arguments on the pending motions in the *Rempas* Case, Mr. Pearson does not plan to attend the Organizational Conference.

## **VI. Proposed Agenda Items**

Counsel for Plaintiffs propose the following agenda items that may be discussed during the Organizational Conference:

- A. Appointment of the Plaintiffs Steering Committee;
  - i. Appointment of Committee Chairs and Members;
  - ii. State/Federal Liaison
- B. Service of Papers.
  - i. Generate Corrected Service List;
  - ii. Potential for Use of a Counsel Contact Information Form;
  - iii. Potential for Stipulation Related to Waiver and Electronic Service Defendants
- C. Direct Filing Order
- D. Master Complaint/Short Form Complaints
- E. Master Answer/Short Form Answers
- F. Protective Order
- G. ESI Protocol
- H. Document Production Protocols
- I. Preservation/Extremis Depositions
- J. Tissue Preservation Protocol
- K. Plaintiff Fact Sheets/Defendant Fact Sheets
- L. Role of Magistrate Judge

Dated: November 10, 2016
